

## FEMA – Ready.gov - During a Power Outage

- Use only flashlights for emergency lighting. NEVER use candles during a power outage or power outage due to extreme risk of fire.
- **Keep refrigerator and freezer doors closed to keep your food as fresh as possible. If you must eat food that was refrigerated or frozen, check it carefully for signs of spoilage.**
- Turn off or disconnect appliances, equipment (like air conditioners) or electronics in use when the power went out. Power may return with momentary "surges" or "spikes" that can damage computers as well as motors in appliances like the air conditioner, refrigerator, washer or furnace.
- Do not run a generator inside a home or garage.
- Do not connect a generator to a home's electrical system. If you use a generator, connect the equipment you want to run directly to the outlets on the generator.
- Listen to local radio and to a battery- or generator-powered television for updated information.
- Leave on one light so that you'll know when your power returns.
- Use a standard telephone handset, cellular phone, radio or pager if your phone requires electricity to work, as do cordless phones and answering machines. Use the phone for emergencies only. Listen to a portable radio for the latest information.
- Do not call 9-1-1 for information—call only to report a life-threatening emergency. Use the phone for life-threatening emergencies only.
- **Take steps to remain cool if it is hot outside. In intense heat when the power may be off for a long time, consider going to a movie theater, shopping mall or "cooling shelter" that may be open in your community. If you remain at home, move to the lowest level of your home, since cool air falls. Wear lightweight, light-colored clothing. Drink plenty of water, even if you do not feel thirsty.**
- Put on layers of warm clothing if it is cold outside. Never burn charcoal for heating or cooking indoors. Never use your oven as a source of heat. If the power may be out for a prolonged period, plan to go to another location (the home of a relative or friend, or a public facility) that has heat to keep warm.
- Provide plenty of fresh, cool water for your pets.
- Eliminate unnecessary travel, especially by car. Traffic signals will stop working during an outage, creating traffic congestion.
- Remember that equipment such as automated teller machines (ATMs) and elevators may not work during a power outage.
